

PPM-2 - PPU Power Management

• **Description:** The PPU Power Management (PPM-2) is a standard power management system for simple marine applications such as container ships. The system has been designed for generator control, supervision and protection functions of up to 8 generators running in parallel, 1 tie breaker and 1 shaft generator.

• **Features include:**

- Separate PMS processor
- Bi-directional communication with AMS systems
- Display unit with two CANbus ports
- Additional operator panel on CANbus for power management control
- USB service port for DEIF utility software
- USB port for advanced logging (operational log, error log, black box recorder)
- Log of event with time stamp and belonging measurements
- SMS/email function
